

At this time, only **front-line healthcare workers** are being vaccinated.

Please do not submit paperwork at this time unless you are a front-line healthcare worker. Please see the attachments from Texas Department of State Health Services for phases.

COVID 19 Vaccine General Information

Please read this form completely before contacting our office.

Complete your forms and email to COVID.vaccine@ntidc.org

When you submit your forms, please include your risk and job function in the body of the email.

NTIDC will be an administration site for vaccines approved for emergency use by the FDA.

As with all sites of administration, we will be following the guidelines set forth by them for priority in vaccinating.

Please refer to the Texas Department of Health and Human Services website and the CDC for updates about phases and when certain groups can receive the vaccine.

www.cdc.gov

Common symptoms for vaccine recipients after the first OR second dose:

- **Fever**- and it can be high after either or both doses. Take Tylenol or Ibuprofen per manufacturers instruction unless contraindicated for your medical history or unless advised not to by your physician.
- **Fatigue**- plan to rest for a few days after each dose.
- **Malaise**
- **Body Aches**- Tylenol or ibuprofen as stated above.
- **Headache**- Tylenol or ibuprofen as stated above.

This vaccine is provided for you by the government; however, the administration of the vaccine (injection) **will be billed to your insurance.**

New Patient paperwork **must be completed in entirety** before we can schedule you for your vaccine.

Appointments only. **No walk-in** appointments.

The vaccine that we will be receiving first is the **Pfizer mRNA vaccine**. It is two doses. Day 0, then at least 21 days after the first.

We will give you your injection and monitor you for reaction for 15-30 minutes after.

There is a phone app that you will be asked to download to report symptoms. You will be given an information sheet at your visit.
